Dear Member,

Textile and Clothing industry in Colombia:

The textile and apparel sector are one of the most important sectors in Colombia representing 13% of total employment in the manufacturing sector.

With several bilateral and multi-lateral regional agreements, import of yarn and fabrics into Colombia have been growing steadily in recent years, for conversion and re-export as well as for domestic consumption. Free Trade Agreement (FTA) between Colombia and USA has prompted several Chain Stores in USA to increase their sourcing from Colombia, thereby offering a greater scope for supplying yarns and fabrics to Colombia for conversion.

Of the total imports of textile products, Cotton Textiles constitutes more than 35% and India is the 2nd largest supplier with a share of 20%.

Fabrics is the product group of Focus since there is a large opportunity, especially in Denim Fabrics & Knitted or Crocheted Fabrics where India' market share has reduced considerably over the past 5 years. (Please refer [Data Sheets](#))
