Export potential for textiles & clothing from India to South Korea

(1) Presently, South Korea is sourcing Textiles & Clothing products mainly from China. Buyers in South Korea are looking at India as their alternate source of supply of Textiles & Clothing products. Indian exporters of Textiles & Clothing can capitalize on this development.

(2) Since recent times, the awareness of the South Korean buyers about India Textiles & Clothing sector is increasing.

(3) Under the Indo-Korea FTA, there is zero duty on import of fabrics, made ups, home textiles and garments into South Korea from India , thereby offering greater market access for Indian textiles into the South Korean market .

(4) South Korea has got tremendous presence in apparels thereby providing good scope for the export of fabrics including Denim fabrics.

(5) The purchasing power of the people in the country is very high thereby providing good scope for export of home textiles.

(6) There is good potential to export yarns and raw cotton to South Korea from India.
